## Summary

Frontend Engineer with ∼2 years of experience building scalable and high-performance web applications using React, Next.js, and TypeScript. Experienced in developing real-time systems, complex state management solutions, and AI-powered interfaces, with a strong focus on clean architecture, performance, and maintainability.

## Professional Experience

**Frontend Developer** Oct 2025 – Jun 2026
***Mavoid*** *Alexandria, Egypt*

- Developed frontend features for **Gazala E-commerce** and **MUP Property Management Systems** using **React** and **shadcn/ui**.
- Implemented a **Lease Management module** with lifecycle transitions (**Draft** → **Active** → **Ended**) and automated invoice generation.
- Developed an **Invoices & Payments workflow** with real-time balance tracking and financial status updates.
- Built the **Maintenance Center** with search, filtering, pagination, and CRUD operations.
- Improved **maintainability and authorization reliability** by refactoring core modules into reusable components, implementing role-based access control, and resolving API permission issues.

**Frontend Developer** Sep 2024 – Sep 2025
***Eyego*** *Riyadh, Saudi Arabia*

- Reduced **page load time by 30%** by optimizing asset pipelines, resolving memory leaks in React components, and improving API response handling.
- Built a **real-time AI-powered tracking system** using **Next.js, Redux, and WebSockets**, enabling state synchronization across connected clients.
- Developed an interactive **multi-floor map editor** using **React and Konva** for zone creation and real-time heatmap visualization.
- Implemented an **AI voice assistant interface** using **LiveKit and OpenAI**, handling real-time audio streaming and conversational state management.
- Improved **system reliability** by implementing Axios interceptors, debugging WebSocket flows, and resolving backend integration issues.

## Projects

**ERP System – Hegazy Motors** | *React, Redux Toolkit, Tailwind CSS* Mar 2026

- Built an ERP frontend system for complex **financial workflows**, including sales & purchase invoices, ensuring consistent and accurate business data.
- Resolved **race conditions** in async forms and **timezone-related inconsistencies**, preventing duplicate operations and improving data integrity and system reliability.

**Kalima Platform** | *React, Tailwind CSS, Framer Motion* Jan 2026

- Solved inconsistent order handling and lack of visibility by implementing a controlled **order lifecycle** (Pending → Received → Confirmed → Returned) with validated transitions and **KPI-based tracking** (response & confirmation time per staff).
- Reduced fraud and manual overhead through **secure verification workflows** (watermarking) and **automated WhatsApp communication** with pre-filled order data, while optimizing performance using memoization for complex UI and large datasets.

**Travel & Tour Platform** | *Next.js, Prisma, PostgreSQL, React Query* Aug 2025

- Built a scalable **booking platform** with dynamic trip management and **secure authentication**.
- Implemented a **real-time AI voice assistant** and optimized **database schemas and API queries** to reduce latency and improve overall system performance.

## Technical Skills

**Languages**: HTML5, CSS3, JavaScript (ES6+), TypeScript
**Frameworks & Libraries**: React, Next.js, Redux Toolkit, React Query, Zustand, Tailwind CSS, Material UI, SASS
**Testing**: Jest, React Testing Library, Playwright
**Databases & Tools**: PostgreSQL, MySQL, Git, GitHub, Docker, REST APIs

## Education

**Web Development Using Python – Intensive Code Camp** May 2024 – Sep 2024
*Information Technology Institute (ITI)*
**Software Development Fundamentals Program** Nov 2023 – Feb 2024
*Information Technology Institute (ITI)*
**Bachelor of Accounting – Faculty of Commerce** Oct 2017 – Aug 2021
*Alexandria University*

## Languages

**Arabic** | **English**
